

T-10C Smart Touchscreen

TC- Series smart touchscreens provide signal processing, AVoIP channels, and customized system control for diverse AV environments.

The TC- Series touchscreens can be located anywhere that is convenient for users to access their AV systems.

All three sizes of touchscreens include signal processing, Dante audio channels and control, all in a single unit to provide everything needed for an entire space.

SERIES FEATURES

- 16x16 transmit and receive Dante channels
- 48 kHz/96 kHz, 24-bit Open Architecture Signal Processing
- 1 x 1Gb Ethernet port
- Run multiple independent Signal Flow Spaces on a single system
- Extensive control options via Symetrix Cognio™ DesignOps control screens, TC-Series touchscreens, WC-Series remotes, and TCP/UDP
- Web server for third party control and personal device integration
- Third-party control via extensive driver library and custom Lua scripting
- External Control using JSON-RPC
- Meets modern security standards including encrypted communications, secure boot, secure firmware updates, and hardware locking
- POE+ power
- Fits US and Euro double-gang wall and junction boxes
- 10 in diagonal, 1920x1200 resolution, 850 nit
